

## Impervious U-Drape

Suresafe Impervious U-Drapes create an impervious barrier to fluid strikethrough. They are designed to act as a protective covering to isolate a surgical site from contamination. The U-Drape has a U-shaped fenestration on one end and an adhesive area of 20cm x 76cm.

### Strong and Durable

Made from low linting, abrasion resistant and impervious material to aid in infection control

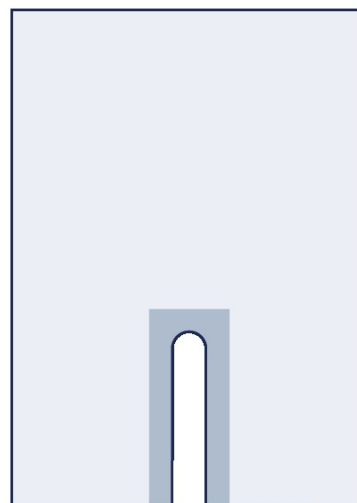

### Adhesive Area

Adhesive area ensures drape remains in place during use

### Conformable

Conforms easily to the shape of the surgical site

### Suitable for:

- Operating theatres
- Emergency departments
- Procedure packs
